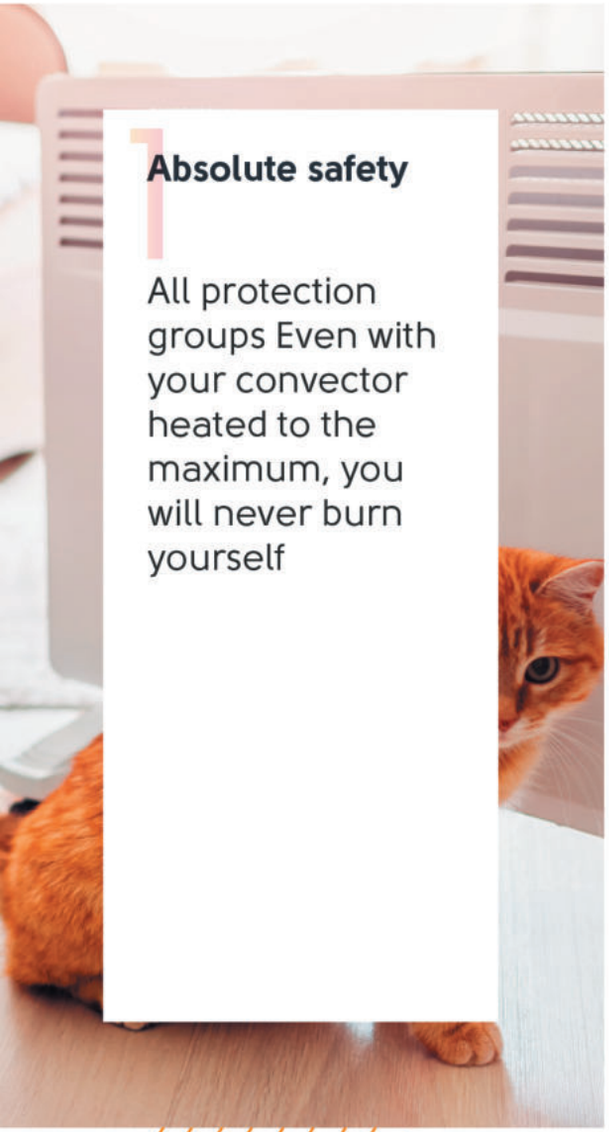
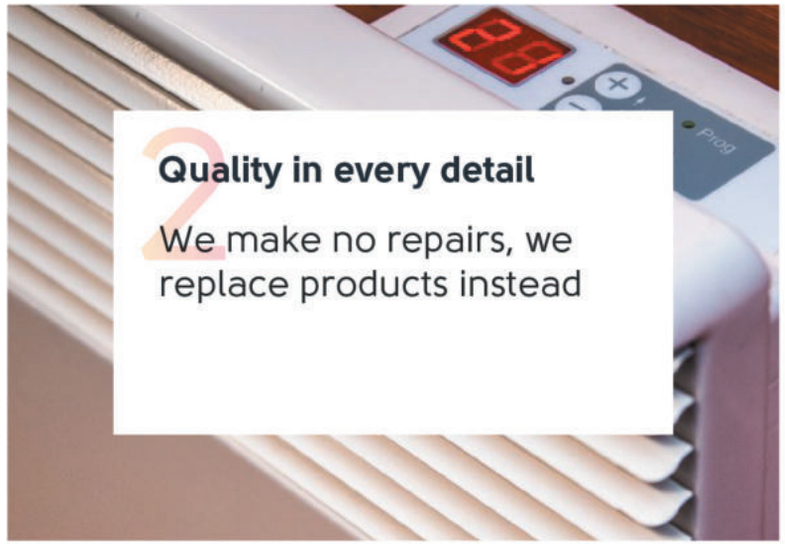
Features of NOIROT Heaters



1

Absolute safety

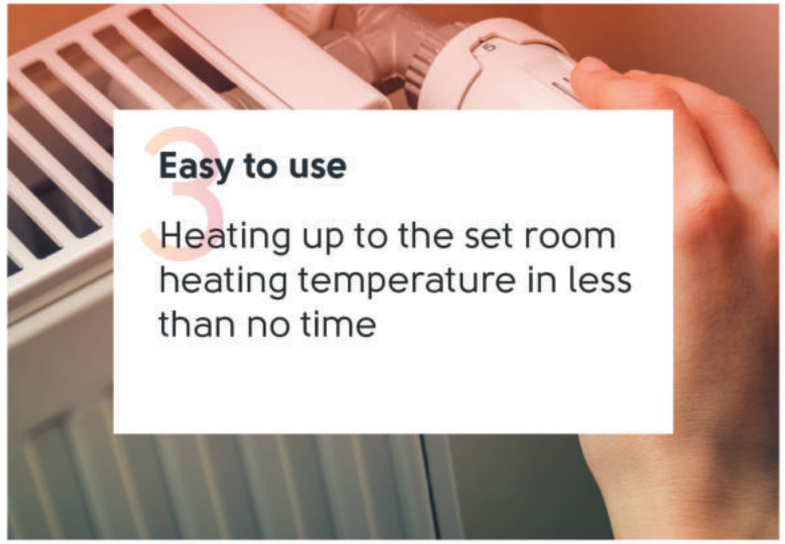
All protection groups Even with your convector heated to the maximum, you will never burn yourself



2

Quality in every detail

We make no repairs, we replace products instead



3

Easy to use

Heating up to the set room heating temperature in less than no time

4

Versatility

Our heaters are suitable for use in all climatic conditions, from the south to the far north

5

State-of-the-art design

A team of European designers is working on the appearance of our products

Technology Employed

CDI

The CDI technology is based on making use of two independent and mutually complementary heat sources

RX-Silence PLUS®

RX-Silence PLUS® heating element is used as the platform for the Spot E3 Plus, Spot E5 Plus, CNX-4 PLUS models

FonteActive®

The unique FonteActive® heating element is the new development by NOIROT, combining the latest achievements

Asic®

The ASIC® digital electronic thermostat controls the electric heater's operation, maintaining the set room temperature with an accuracy of 0.1 °C

Smart ECO-control

With the Eco-control series of heaters, you do not have to choose between comforts and energy savings: a human presence sensor, draught protection function, consumption indicator, digital control unit, ºCideal feature (ideal temperature)
